Handicare 2000
Curved stairlift

The benefits of a Handicare 2000 curved stairlift

If you are thinking about installing a stairlift, and your stairs turn corners or are spiral, the Handicare 2000 offers you a safe and reliable solution.

Handicare stairlifts have helped thousands of people overcome the problems posed by going up and down their stairs at home.

The Handicare 2000 stairlift suits most staircases with bends or corners and offers you all the basic functions that you would expect plus the option to upgrade to a powered seat swivel and/or folding footplate.

With a choice of six upholstery colours and two track colours the Handicare 2000 compliments most colour schemes.

Fitted to the stairs, not the wall, it is unlikely you will need to redecorate following the installation of your Handicare 2000 stairlift.

Like all Handicare stairlifts the 2000 Series has a battery backup which means it will continue to work in the event of a power cut so you do not need to worry about being stranded up or downstairs.

The compact unit folds up leaving the staircase free for other users and the bespoke track is designed to fit your individual staircase and maximise clear space on the stairway. It can be supplied with a powered hinged track if required.

The Handicare 2000 also comes with two remote controls which means, once folded, you can easily send it to the upstairs charge point freeing up space in your hallway.

Safety as standard

Your Handicare 2000 stairlift will come with a range of safety sensors that are designed to stop your stairlift if it meets any obstruction as you travel up the stairs.

Your Handicare 2000 stairlift has an easy release retractable seat belt for added peace of mind. If you prefer you can have an easy fasten Velcro seat belt.

Easy to use

The operating toggle is easy to use, simply hold it towards the direction you wish to travel, up or down, and your Handicare 2000 will move smoothly and gently on its way.

The control is conveniently located at the end of the arm leaving both arms clear to provide unhindered support when getting on or off the seat.
